---	--

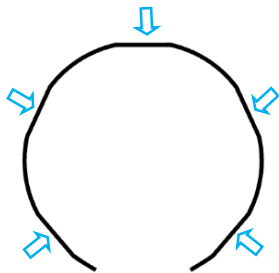

<b>Date:</b> 25.02.2020	<b>Priority</b>	<b>Need for action</b>
<b>Affected machines:</b> Schaerer Barista	High	As soon as possible
<b>From serial number:</b> -	Medium	On next visit to the machine
<b>As of date:</b> Immediately	X Low	X FYI only

## IMPROVEMENT

### Sieve holder ring 33.2672.5000

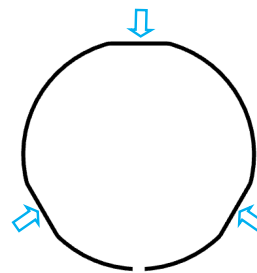

By changing the geometry and additionally increasing the pretension of the sieve holder ring, it has become possible to achieve a permanent improvement in the holding force, while still allowing easy removal of the brewing sieve from the Portafilter for cleaning.

#### NEW

- The new sieve holder ring is easy to recognize due to the 5 flattened edges and larger opening

#### PREVIOUSLY

- The previous sieve holder ring had 3 flattened edges and has a tighter curve.

## Series and spare parts solution

The optimization has been introduced into series production with the following serial numbers:

12629, 12682, 12695 – 12697, 12699 – 12705, 12707 and ff.

The spare parts store has been updated and only optimised sieve holder rings will now be delivered. The Portafilters and maintenance packages in the spare parts store have also been revised

## Technician information

We recommend replacing the sieve holder ring in case of complaints regarding brewing sieves that do not remain in the Portafilter when knocking out.
