

T.I. no.: 2022-05 Updated:	Topic: Temporary Spare part valve block with coils
--------------------------------------	---

Date: 14.02.2022	Priority	Need for action
Affected machines: SC Club	High	As soon as possible
From serial number: -	Medium	On next visit to the machine
As of date: immediately	x Low	x FYI only

TEMPORARY SOLUTION - SPARE PART VALVE BLOCK WITH COILS

We would like to inform you today about a temporary measure regarding the spare part 4-fold hot water valve block of the SCClub. This measure will be withdrawn after the remaining stocks have been used up.

Reason for Change

With the Technical Information "2021-23 (SC Club) Maschine modification 03" you were informed that the brewing valve is no longer integrated in the 4-position hot water valve block and will be positioned as a single valve at another location in the machine.

Unfortunately, not all 4-position hot water valve blocks could be used up in production in time prior to the change to Mod. 03, so that a larger quantity of 4-position hot water valve blocks with coils is still available in the production stock.

Although spare part valves are normally supplied without coils, it was decided for reasons of economy and sustainability to up the available 4-position hot water valve blocks with coils as spare parts.

Spare Part Solution

The 4-position hot water valve blocks with coils have been put into storage in the Schaeerer spare parts stock under the same part number as the valve blocks without coils.

- **33.4150.2000**

A note was attached to the 4-position hot water valve block with coils for explanation purposes.

Advice for Technicians

If you use a 4-position hot water valve block with coils in case of service, it is recommended to exchange the complete valve block with coils.

As soon as the 4-position hot water valve blocks with coils are used up, the regular spare part hot water valve blocks without coils will be supplied again without further information.
